

SUBJECT INDEX

- Antitranspirants, tomato, stomata, composition, 369
- Apple, bruising, cultivars compared, 9
 - bruising sensitivity measured, 9
 - canopy efficiency, assessment, 153, 161
 - composition, ethylene, harvesting, 465
 - cultivars, compared, bruising, 9
 - Cox's Orange Pippin, 1, 181, 439, 447
 - Bramley, 181
 - Discovery, 181
 - Empire, 465
 - Golden Delicious, 1
 - Suntan, 439
 - diseases, *Phytophthora cactorum*, 457
 - fruit, calcium balance, 171
 - quality, growth regulators, 439
 - softening, growth regulators, 15
 - growth regulators, effects, 439
 - harvest, ethylene, storage, quality, 465
 - herbicides, quality, 447
 - nutrition, fruit, calcium, 171
 - nitrogen, quality, 447
 - precocity, growth regulators, 181
 - propagation, budding height, 1
 - quality, ethylene concentration, 465
 - herbicides, nitrogen, 447
 - rootstocks, evaluation, 429
 - identification, peroxidase polymorphism, 147
 - M.9, 1
 - M.26, 1
 - MM., 147
 - MM.106×M.27, 429
 - MM.111, 1
 - shoot, growth, growth regulators, 438
 - storage, ethylene concentration, 465
 - yield, growth regulators, 439

- Begonia*×*hiemalis*, leaf growth, daylength, 523
- Blackcurrants, light, bud yield, 479
 - plant density, bud yield, 479
- Blueberry, nutrition, iron, 287
 - nutrition, micronutrients, 287
 - pH, 287
- Boron, pea, nutrition, 343
- Breeding, broccoli, 205
 - leek, review, 407
- Broccoli, breeding, genetics, 205
 - breeding, plant spacing, 205
- Bruising, apple, cultivars compared, 9
- Budding height, apple, 1

- Calcium, nutrition, apple fruit, 171
- Camellia, micropropagation, rooting, 113
- Canopy, development, apple, 153
 - efficiency, assessment, apple, 153, 161
- Carbon dioxide, cucumber propagation, 303
- Carrot, crop uniformity, embryo measurement, 497
 - embryo measurement, crop uniformity, 497
 - plant weight, embryo length, correlation, 71
 - seed, harvest time, 57
 - threshing, conditioning, 57
 - variability, plant weight, embryo length, 71
- Catalase, activity, diseased citrus, 283

- Cauliflower, nutrition, growth, maturity, 503
 - transplant age, growth, maturity, 503
- Cherry, cultivars, Early Rivers, 191, 471
 - fruit setting and retention, 191
 - growth, paclobutrazol, 471
 - translocation, growth regulators, 191
 - yield, paclobutrazol, 471
- Chinese cabbage, disorders, leaf tipburn, 509
 - root growth, tipburn, 509
- Cincturing, litchi, stages compared, 135
- Citrus* spp., diseases, *Phomopsis citri*, 283
- Climate, cold acclimation, watercress, 373
- Cocoa, flooding, growth affected, 265
 - water relations, growth, flooding, 265
- Cold acclimation, watercress, 373
- Colocasia gigantea*, seed storage, germination, 217
- Compatibility, cross, *Meconopsis* spp., 257
- Composition, pea, nutrition, 343
- Copper nutrition, papaya, 397
- Courgette, plant density, quality, 295
 - plant density, yield, 295
- Cucumber, propagation, CO₂, 303
 - propagation, temperature, 303
 - yield, propagation conditions, 303
- Cyclamen, seed, germination, 379
- Daylength, *Begonia* × *hiemalis*, leaf growth, 523
- Density, plant, courgette, 295
- Disorders, Chinese cabbage, leaf tipburn, 509
- Electrophoresis, apple rootstock identification, 147
- Embryo, carrot, measurement, 497
 - length, carrot, plant weight, correlation, 71
 - measurement, machine vision, 497
- Enzyme, activities, citrus, *Phomopsis citri*, 283
- Ethylene concentration, apple, harvest, storage, 465
- Fertility, self, *Meconopsis* spp., 257
- Flooding, cocoa, growth affected, 265
- Fruit, set, retention, growth regulators, 191
 - setting agents, affect tomato yield, quality, 243
 - softening, apple, growth regulators, 15
- Genetic stability, loganberry, micropropagation, 33
- Germination, seed, *Colocasia gigantea*, 217
 - seed, cyclamen, 379
- Ginseng, growth, yield, temperature affects, 129
 - temperature, growth, yield, 129
- Grafting, mango, off-season fruiting, 141
- Growth, cauliflower, transplanting, nutrition, 503
- Growth regulators, apple, precocity, 181
 - apple, flesh softening, 15
 - growth, yield, quality, 439
 - cherry, growth, yield, 417
- compounds, adenine, 89
 - AMP, 89
 - ascorbic acid, 89
 - daminozide, 15
 - ethephon, 181, 533
 - ethylene, 15
 - GA, 89, 191
 - IBA, 113
 - NAA, 533
 - NOXA, 191
 - paclobutrazol, 181, 439, 471
 - PGS-10, 89
 - Promalin, 89
- fruit set, retention, 191

- litchi, early ripening, 533
 - micropropagation, rooting, 113
 - papaya, bud growth, 535
 - surfactant addition, 439
 - tomato, enzymes, growth, 89
- Harvest, date, leek, seed production, quality, 307, 315
- date, radish, sowing date, 349
- Herbicides, apple, quality, 447
- In vitro* propagation, axillary shoots, 423
- Insecticides, compared, control *Otiiorhynchus sulcatus*, 109
- potato, quality affected, 239
 - raspberry, *Resseliella theobaldi*, 485
- Iron, blueberry nutrition, 287
- Irradiance, onion photoperiodism, bulbing, 331
- Irrigation, tomato, 95
- Leaf, growth, mathematical model, 523
- growth, *Begonia* \times *hiemalis*, daylength, 523
 - removal, tomato, development, yield, 353
- Leek, breeding, review, 407
- seed, grading, quality, 315
 - production, quality, cultural factors, 307
- Lemon, cultivars, chemical characteristics, 277
- cultivars, compared, 277
 - Eureka, 277
 - Fino, 277
 - Lisbon, 277
 - physical characteristics, 277
 - Verna, 277
- Lettuce, composition, nutrition, peat, 515
- growth, raising methods affect, 81
 - induced stress, 325
 - lime, yield, quality, composition, 515
 - nutrition, yield, quality, composition, 515
 - peat, nutrition, 515
 - quality, light, stress, 325
 - nutrition, peat, 515
 - seedling production effects, 81
 - supplementary lighting, 325
 - transplant quality, light, stress, 325
- Light, blackcurrants, bud yield, 479
- Lighting, supplementary, lettuce, 325
- Lime, lettuce, peat, 515
- Litchi, cincturing, flush, flowering, 135
- growth flush, flowering, cincturing, 135
 - growth regulators, ripening, 533
 - ripening, growth regulators, 533
- Loganberry, cultivar, Thornless Logan, 33
- genetic stability, 33
 - thornlessness, genetics, 33
- Macronutrient nutrition, pea, 343
- Manganese nutrition, papaya, 397
- Mango, cultivars, Dashehari, 141
- cultivars, Royal Special, 141
 - Totapari, 141
 - flowering, fruiting, graft induced, 141
 - grafting, off-season fruiting, 141
 - off-season, fruiting, grafting, 141
- Maturity, cauliflower, transplanting, nutrition, 503
- Meconopsis* spp., cross-compatibility, 257
- self fertility, 257
- Micronutrients, lettuce, peat, 515
- Micropropagation, explant origin, 43, 121
- loganberry, genetic stability, 33
 - media composition, 121

- root development, 417
 - Senecio*×*hybridus*, 121
 - watercress, 251
- Microscopy, fluorescence, root development, 417
- Molybdenum nutrition, papaya, 397
- Nitrogen, apple, quality, 447
- Nursery stock, pest control, *Otiorthynchus sulcatus*, 109
- Nutrient, availability, uptake, blueberry, 287
- Nutrient film culture, tomato, 361
- Nutrition, blueberry, 287
 - cauliflower, growth, maturity, 503
 - lettuce, yield, quality, composition, 515
 - papaya, bud growth, 535
 - Mn, Cu, Mo, 397
 - Pleurotus flabellatus*, 223
- Obituary, Cyril West, 555
- Okra, seed and fruit production compared, 233
- Onion, bulbing, photoperiod, 331, 337
 - bulbing, plant age, size, 337
 - photoperiodism, bulbing, 331, 337
 - plant age, size, 337
- Orange, fruit, chemical characteristics, 389
 - fruit, morphology, 389
 - old clone and nucellar compared, 389
- Otiorthynchus sulcatus*, control, nursery stock, 109
- Oyster mushroom, see *Pleurotus flabellatus*
- Papaya, bud growth, growth regulators, 535
 - bud growth, nutrition, 535
 - nutrition, Mn, Cu, Mo, 397
- Parthenocarp, tomato, fruit development, 103
- Pea, composition, nutrition, 343
 - nutrition, boron, 343
 - composition, yield, 343
 - P, K, Ca, Mg, 343
 - yield, nutrition, 343
- Pear, cultivar, Conference, 23, 191
 - fruit setting and retention, 191
 - quality, storage, 23
 - storage, orchard factors, 23
 - translocation, growth regulators, 191
- Peat, lettuce, nutrition, lime, 515
- Peroxidase, activity, diseased citrus, 283
- pH, blueberry nutrition, 287
- Phomopsis citri*, citrus, 283
- Photoperiodism, *Begonia*×*hiemalis*, leaf growth, 523
 - onion, bulbing, 331, 337
- Phytophthora cactorum*, apple, 457
- Plant density, blackcurrant, bud yield, 479
 - leek, seed production, quality, 307, 315
- Plant weight, carrot, correlation embryo length, 71
- Planting date, radish, harvest date, 349
- Pleurotus flabellatus*, nutrition, 223
- Plum, cultivar, Victoria, 191
 - fruit setting and retention, 191
 - translocation, growth regulators, 191
- Pollen, stainability, *Rubus*, 49
- Pollination, self, *Rubus*, 49
- Potato, composition, chemicals affect, 239
 - quality, haulm-killers affect, 239
 - insecticides affect, 239
- Propagation, axillary shoot enhancement, 423
 - budding height, apple, 1
 - cucumber, temperature, CO₂, 303
 - explants, root development, 417
 - grafting, mango, 141
 - see also Micropropagation

- Proline, tomato, composition, 369
- Prunus cerasifera*, micropropagation, 43
- Quality, courgette, plant density, 295
 - tea, factors affecting, 549
- Radish, sowing and harvest dates, relations, 349
- Raspberry, disease, midge blight, 485
 - pests, *Resseliella theobaldi*, 485
- Relative water contents, tomato, 369
- Resseliella theobaldi*, raspberry, 485
- Review article, leek breeding, 407
- Root, development, micropropagation, 417
 - growth restriction, Chinese cabbage, tipburn, 509
- Rootstocks, apple, evaluation, 429
 - identification, peroxidase polymorphism, apple, 147
- Rubus*, cultivars, pollen stainability, 49
 - cultivars, self-pollination, 49
 - self-pollination, seed set, 49
- Seed, germination, cyclamen, 379
 - grading, leek, quality, 315
 - harvesting, handling, carrot, 57
 - performance, handling effects, carrot, 57
 - production, leek, cultural factors, 307
 - quality, leek, cultural factors, 315
 - storage, germination, *Colocasia gigantea*, 217
- Seedling production, lettuce, growth effects, 81
- Senecio* × *hybridus*, micropropagation, 121
- Shoots, axillary, propagation, 423
- Spiraea* × *bumalda*, micropropagation, 43
- Steckling, weight, leek, seed production, quality, 307, 315
- Storage, pear, orchard factors, 23
 - seed, *Colocasia gigantea*, 217
- Strawberry, cultivars, Cruz, 201
 - cultivars, Douglas, 201
 - Sequoia, 201
 - initial plant size affects yield components, 201
 - winter-planted, Lebanon, yield, 201
 - yield components, initial plant size, 201
- Stress, mechanical, lettuce, 325
- Surfactants, growth regulators application, 439
- Tea, browning potential, clones, seedlings, 545
 - clones, seedlings, browning potential, 545
 - factory processes, quality, 549
 - field practice, quality, 549
 - quality, browning potential, 545
 - factors affecting, 549
- Temperature, cucumber propagation, 303
 - ginseng, growth, yield, 129
- Thornlessness, loganberry, genetics, 33
- Tissue culture, camellia, 113
- Tomato, antitranspirants, stomata, composition, 369
 - composition, antitranspirants, 369
 - proline, relative water contents, 369
 - development, leaf removal, 353
 - dry matter partitioning, salinity, 361
 - emergence, growth regulators, 89
 - fruit, growth, salinity, 361
 - greenhouse grown, irrigation, 95
 - growth, growth regulators, 89
 - irrigation, 95
 - leaf removal, development, yield, 353
 - nutrient film culture, 361
 - parthenocarpic types, compared, 103
 - parthenocarpic, fruit development, 103
 - quality, fruit setting agents affect, 243

salinity, dry matter, fruit growth, 361
stomatal opening, antitranspirants, 369
yield, fruit setting agents affect, 243
 leaf removal, 353

Transplant age, cauliflower, growth, maturity, 503

Uniformity, crop, carrot, 497

Water, relations, flooding, cocoa, 265

Watercress, cold acclimation, 373

 micropropagation, 251

 nutrient status, cold acclimation, 373

 season, cold acclimation, 373

West, Cyril, obituary, 555

Yield, courgette, plant density, 295
